CORRECTIONS RISK ASSESSMENT AND SAFE HANDLING (CRASH) OF ILLICIT DRUGS

RISK-BASED RESPONSE TRAINING

8-Hour On-Site Instructor Led Training Course

COURSE TOPICS:

- Drug awareness
- Synthetic opioids
- Understanding exposures
- Determining levels of risk
- Don/doff PPE
- Decontamination
- Neutralization and disposal
- Safe handling and packing
- Field testing best practices

COURSE DESCRIPTION:

This 8-hour instructor led training course will prepare corrections officers, guards, and medical staff to perform a risk-based response to illicit drugs and paraphernalia in the correctional environment.

Participants will learn to recognize and safely handle illicit drugs using a scalable response process appropriate to the level of risk.

Participants will learn to adjust the level of PPE required, level of self-decontamination needed, and employ safe work practices based on the totality of circumstances.

Personnel will receive scientifically validated drug exposure training to assist them in making sound risk assessments about officer safety.
